THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

Reasons for Allowance

1. An after-final amendment was received from the applicant on February 17, 2010.
2. Claims 1-59 are allowed.
3. The following is an examiner's statement of reasons for allowance. The method for controlling a watercraft as claimed is not shown or suggested in the prior art because of the use of a method that includes the step of prepositioning an angle of a rear propulsion device of a watercraft in order to provide a sideways force so as to minimize yaw prior to the occurrence of a heading error, where said angle is based on operating characteristics of said watercraft. The prior art also does not show or suggest the use of said method including the step of determining a plurality of algorithm gains based on a heading error and a heading error rate in order to control an amount or rate of deflection of a nozzle of a watercraft, or the steps of acquiring a heading turn rate from an angular rate of turn sensor and calculating a heading of a watercraft based on the heading turn rate and an original heading, or the steps of measuring an amount of error induced by the effect of magnetic, electrical or vibration disturbance on heading data from a heading sensor and correcting said heading data by adding a correction value to said heading to offset a measured amount of error induced by said disturbance, or the steps of determining if a steering apparatus is off-center for altering a position of a nozzle of a watercraft and, if said steering apparatus is in a center position, setting a nozzle position command to oppose a turn of said watercraft, or the step of engaging a thruster after a predetermined time delay to provide sideways movement after a stern of

Art Unit: 3617

a watercraft has gained sideways momentum from a rear propulsion device, or the step of reducing an effect of electromagnetic field interference on the accuracy of a heading signal from a magnetic heading sensor by either compensating for said field interference or acquiring a heading signal only when electromagnetic interference is low enough to prevent inaccuracy of heading data.

4. The prior art as disclosed by Braddon (US 3,715,571) shows the use of a method for calculating a heading of a watercraft, said method including the steps of acquiring a heading of a watercraft from a heading sensor, acquiring a heading turn rate from a yaw rate transmitter, determining if said acquired heading is accurate using a heading integrator, calculating a heading based on said heading turn rate and said acquired heading, and outputting said calculated heading for control of said watercraft. Wesner (US 3,604,907) discloses a method for correcting a heading of a watercraft, said method including the steps of measuring an amount of error induced by a disturbance on data from a heading sensor, acquiring heading data from said heading sensor, determining if a disturbance is occurring, correcting said heading data with a filtering function, and outputting corrected heading data for control of said watercraft.

McKenney et al. (US 6,230,642) discloses a method for controlling a watercraft, said method including the steps of prepositioning an angle of a rear propulsion device of said watercraft after engagement of a thruster to provide sideways force that minimizes yaw prior to the occurrence of a heading error. Ford et al. (US 5,509,369) discloses a method for controlling a heading of a watercraft, said method including the steps of acquiring a desired heading using an automatic steering system, acquiring an actual

Art Unit: 3617

heading using a flux gate compass, calculating a heading error by comparing said desired heading with said actual heading, determining a rate of change of said heading error using a heading gain multiplier, determining algorithm gains used to control a rate of deflection of a steering actuator, determining an amount of deflection for said steering actuator, deflecting said steering actuator based on said determined amount of deflection, and repeating said steps until said actual heading equals said desired heading.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication from the examiner should be directed to Exr. Lars Olson whose telephone number is (571) 272-6685.
